*Email and Internet Use
Policy*

(Students-P-3 and 4-7)

EMAIL AND INTERNET USE POLICY - STUDENTS (K - 3)

Rationale

Email and the Internet give people a way of communicating with our friends or other people all over the world. We can send messages through email. We can also find out about many things by searching the Internet for information. Using the Internet in a sensible way, can help us learn many skills and find out interesting things about the world.

When we use the Internet we must always use it in a way that does not hurt ourselves or other people. We must remember that we are a part of a Catholic school and that Jesus wants us to follow him by always trying to do our best.

When we communicate on the Internet we must always be honest and treat other people kindly. We must follow the school rules about the Internet and email so that we are safe and happy and so that we can learn new things in an exciting way.

Definition

Information and Communication Technology (ICT) means all computer hardware, software and systems and technology (including Internet and email) and telecommunications devices in facilities that may be used or accessed from a school campus or connected to a schools' communication network.

Principles

- St Patrick's School has made rules about how students use email and the Internet so that they can use it in the best way. Students must follow these rules and listen to their teacher so that ICT can be used to communicate with others and learn about things.
- St Patrick's School has made rules about using ICT so that everyone at the school is safe and happy. Students can use ICT only if they look after it and follow all the rules about the use of ICT.
- St Patrick's School can check all the school's ICT to make sure students are following the school rules.

Procedures

- Students must obey all of the school rules about email and the Internet and take good care of the school computer equipment.
- Students must only use the *school software on the school's computers*. Students are not to bring any software from home, to install on the school computers.
- Students can only send emails, with their teacher's permission.
- Students must only access sites on the Internet that a teacher has said they can use. If students find anything on the Internet that makes them feel bad or uncomfortable they must click on *HOME* or turn the monitor off immediately and tell their teacher.

- Before students send an email it must be shown to the teacher. Everything a student writes in an email or through the Internet must be their best work, that they would be proud to show their parents. A student can not use email or the Internet to annoy, bully or frighten anyone.
- People who put information on the Internet for students to read, own that information. If students use anything from the Internet in their own work they must check with their teacher before they copy it, to make sure they have the owner's permission to copy it.
- Students shall never tell anyone via email or the Internet their name, address, telephone number or any other private information. Students shall not send their photograph to anyone without checking with their teacher and having a permission note from their parents.

EMAIL AND INTERNET USE POLICY - STUDENTS (4 - 7)

Rationale

Information and Communication Technology (ICT), and in particular the Internet and email, are valuable tools in the Catholic school's goal to educate the whole person. The Internet offers great educational opportunities when it is used responsibly. Using email and the Internet, enables students to communicate with people all over the world and research interesting topics. It can also be harmful if students do not follow the School's rules and access or send inappropriate material. As students in a Catholic school we must remember our responsibility to use email and the Internet in a positive way to help spread the "Good News" of Jesus. We do this through our words and actions. Our communications must always be truthful and respectful of other people.

Definition

Information and Communication Technology (ICT), means all computer hardware, software, systems and technology (including the internet and email) and telecommunications devices in facilities that may be used or accessed from a school campus or connected to a school's communication's network.

Principles

- The St Patrick's School's ICT is provided for educational purposes only.
- Using St Patrick's School's ICT is a privilege. This privilege can be removed if school rules are broken. Students using the school's ICT must not break State or Federal laws.
- The school has the right to check all written, graphic, audio and other materials created, produced, communicated, stored or accessed on school ICT by students, including emails.
- Students shall be made aware that access to ICT, particularly the Internet and email, can expose them to inappropriate material or potential harm

Procedures

- Students must understand that the use of St Patrick's School's ICT is a privilege. This privilege may be lost if a student uses ICT in an unacceptable or inappropriate way.
- The acceptable and unacceptable use by students of the ICT are listed below:
- **Acceptable use includes:**
 - Following teacher's instructions
 - Accessing only the information the teacher has agreed to
 - Being polite and courteous when emailing
 - Seeking the teacher's permission before sending an email
 - Researching information for a topic or assignment given by the teacher
 - Correctly acknowledging the work of others according to Copyright laws
 - Respecting the privacy of others including other students and staff members
 - Informing the teacher if you are concerned that you have accidentally accessed inappropriate material
 - Handling all ICT equipment with care

Unacceptable use includes:

- Using ICT without permission or without supervision by a teacher
 - Visiting any site that has not been approved by the teacher
 - Using the Internet to access offensive or inappropriate information
 - Interfering with emails or files belonging to others
 - Downloading anything without the teacher's permission
 - Sending a personal photograph without the written permission of a parent
 - Sending anything without the teacher's permission
 - Sending or receiving a message which has a false name or has used another's name without permission
 - Sending an email to bully, frighten, annoy or upset a person

Information Communication Technology (ICT) Acceptable Use Agreement for Students

As a parent/guardian or carer you do not have to sign this Agreement. However, if it is not signed and returned to school, your child will not be permitted to access the learning technologies within the school.

PARENT/GUARDIAN/CARER AGREEMENT

As the parent/guardian/carer of (please insert name)

.....
I agree to the Information Communication Technology (ICT) Acceptable Use Policy of St Patrick's School and will endeavour to ensure the child in my care adheres to this policy. I understand the consequences of misuse of the computer network system at St Patrick's School.

Signed Date:

STUDENT AGREEMENT

As a student I agree to the Information Communication Technology (ICT) Acceptable Use Policy of St Patrick's School and will always try to do the right thing and use the computer network at school properly. I know that the correct use of the computer network is part of my *Student Code of Conduct* that I agree to at school. I know that if I deliberately misuse the network, there will be consequences for my actions.

Signed Class:

Please return this Agreement to your child's class teacher
